## REPORT.

---

*To His Excellency,*

*L. F. Grover,*

*Governor of the State of Oregon:*

I have the honor to herewith submit the following detailed report of the condition, workings, expenditures, etc., of the State Penitentiary, from the sixteenth day of Sept., A. D., 1870, until the first day of Sept., 1872.

The condition of the old temporarily constructed buildings, at the time the management of the institution was entrusted to the present Superintendent, is too well known to need description here.

At the time of entering upon the duties assigned me, it was an entirely new field of labor. I had supposed that to fill the office of Superintendent would require only a portion of the officer's time; before the first quarter had closed, I found a mistake had been made in this respect, and soon came to realize that fine-spun theories upon the government, control of convicts, and the utilizing of their labor sufficiently to earn the annual expenditures made in their behalf, was one branch of the subject, and the actual proceeding another.

The two principal objects I had in view, when accepting the position tendered me, were:

First, a belief that I have always had, that it could be made a self-sustaining institution. This belief was founded upon the theory that a man's labor inside prison walls was worth as much as outside, if properly managed. In this, I find myself not mistaken, as, by reference to the tables annexed, it will be seen that the prison has been a self-supporting institution, for the two years past. By those tables it will be seen that the days' work for common labor, charged up to the new building, have been only at the rate of two dollars per day, when the same labor of free men could not have been procured for less than three. For carpenters, blacksmiths, and other skilled laborers, the charges are made at the rate of three dollars per day, which is less, from one to two dollars, than the usual price for the same labor performed by free men.

In the second object in view, the safe keeping of the convicts, I am sorry to say, the Superintendent has not been so successful as he would like to have been, though not through any want of care on his part. The two convicts, now at large from the present administration, escaped under the following circumstances:

William Burst was employed in driving the team, under directions of and in charge of the prison teamster, for several days previous to his escape. I instructed the guard to keep a sharp lookout for him, as he seemed to be uneasy, a certain sign to the officer of the prison that something unusual is on the tapis. In April the teams were ordered out, to be used in planting potatoes in a small field. In the afternoon the officer in charge sent a prisoner to the prison to inform the Superintendent that Burst had escaped. The stories of the convict and guard, concerning the escape, differed so materially that it created a suspicion on the part of the officer that all was not as it

should be, but nothing definite could be learned at that time. Since then the Superintendent has become satisfied that Burst escaped through collusion with the officer in charge of the prisoners in the field. In evidence of the same, I have the affidavit of Brown, discharged convict, of a conversation overheard by him in the wash-house, previous to Burst's escape. Brown, it is true, was a convict, sent from Jackson county for a not very heinous offence, and his testimony was voluntary, after the expiration of his sentence, as I was not aware until that time that he had any knowledge of the matter, though cognizant of his being in the wash-house at the time, together with Burst and the officer. Corroborating testimony was afterward received, in the shape of similar promises of escape to other prisoners, for which the officer was discharged from the service of the State.

The escape of George Bargeman, alias Shultz, and Joseph Hackney, took place on June 8, 1871, about as follows: Fifteen convicts were detailed to assist as tenders to masons on the new building, in accordance with requisitions of the Building Committee. This compelled the Superintendent to use two sets of guards, the prisoners being divided between the brickyards and the new building. I could not furnish as many guards as was absolutely necessary, but knowing that from fifteen to twenty free men were at work on the building, deemed the matter safe. At three o'clock, word was sent me, on the brickyard, that a break had been made by the prisoners. The usual regulations of tapping the bell, calling in all the prisoners, counting them, etc., were gone through with, and it was found that the above two prisoners were gone. The guards were satisfied they had seen Bargeman go into the brush, as he had been wearing a peculiar hat which they

recognized. Search was instituted, and a ladder found where they had scaled the walls. Near the ladder lay Bargeman's shoe and shackle stirrup. These and his peculiar hat, which Hackney was wearing instead of him, as we afterward found, were only blinds used by him to throw us off the scent. Hackney, wearing Bargeman's hat, had gone over the fence, while the latter, being too heavily ironed for such work, had concealed himself in a very ingeniously made excavation near the foundation of the building, out of sight of the guard. He was employed in filling in along the foundation, and had left a place where a man could stow himself away with almost perfect safety from detection, especially if he had some one to cover him up with the filling-in dirt. There is but little doubt in the mind of the Superintendent that Bargeman had assistance from some one not connected with the prison. It will readily be seen, that, the guard being positive he saw Bargeman go into the brush and finding his shoe and stirrup near the ladder, the officers were entirely misled. Still a guard was kept around the new building, but the night being very dark, he escaped before morning, leaving his place of concealment very patent to an observer. I have been thus minute in the details of these escapes to show that, even with the Superintendent constantly on the watch, he cannot always prevent escapes, being liable to be imposed upon by unfaithful employes, and taken advantage of by free labor mixed up with convict. I have also been more minute in this matter, because I was charged by the press and interested individuals with winking at these things, and desire your Excellency and the Legislature to judge if there was any evidence of carelessness on my part, or of collusion, in any way, with the escapes. If I feel myself at all culpable in the matter, it is for allowing bad men around the outside of the

prison who should more properly be in; but the best judges of human nature are sometimes deceived.

### SUPPLIES.

As soon as practicable, after finding the amounts of all staple articles needed for a quarter's use, I advertised for proposals to furnish the same for stated times. These articles included wood, sand, flour, beef, and leading articles of groceries, such as coffee, sugar, rice, salt, etc. But few proposals were received, as the usual dealers in such articles were afraid of the State paper, the cash in the treasury being, or nearly, exhausted, compelling them to take warrants, and the Investigating Committee of the last Legislature having cut down certain warrants, a distrust of that kind of pay was general among merchants and business men. I think, if there had been money in the treasury to pay for supplies as purchased, the total for the two years would probably have been ten per cent. less. Afterward, the appropriation having been exhausted and nothing but vouchers being paid, as the Secretary of State could not draw warrants, the Superintendent found more difficulty in procuring the necessary articles.

The contracts were awarded to the lowest responsible bidders. For flour, to Messrs. Moores, Miller & Co.; for wood, Samuel Bass; for groceries, Messrs. M. Meyer & Son, etc., as appears from proposals and contracts, on file in the office.

The articles furnished have been of an uniformly good quality, no attempt having been made by contractors to put upon the prison an article not according to the contract.

## IMPROVEMENTS.

During the two years many valuable improvements upon the real property have been made.

The whole amount of land belonging to the State is under fence and mostly grubbed and cleaned and under good cultivation. This year a good crop has been taken off. An orchard of six hundred trees has been put out which is growing finely, and in another year will furnish all the fruit—a very essential article of diet—the prison will require. A large dwelling house for use of the officers, capable of holding two families, has been erected.

Much time and labor have been expended in building a road to the city, which previously was in poor condition, and at some seasons of the year actually impassible for loaded wagons, rendering it very difficult in getting supplies.

Have erected large and commodious workshops for winter work of convicts, as also a tannery nearly finished, which in working order will furnish a large return to the State, and be one of the best branches of industry that convict labor can be employed upon, it being an easily acquired trade and the expense of carrying it on being mostly in the labor performed. Have tan bark on hand and expect to commence operations this winter.

These improvements have drawn heavily upon the appropriation; they are all permanent and could ill be dispensed with, and if properly managed will pay for themselves within a year.

The stockades and fences when the property was turned over to the present Superintendent were some of them in a very bad condition and had to be rebuilt. In fact when I took possession of the State Prison I should not have recognized it as such an institution had it not been for the

*seventy-three ragged convicts* turned over by Maj. M. P. Berry late Superintendent. The buildings were dilapidated and were rotting away. They had been condemned as a prison by two Grand Juries and by the report of my predecessor. No sidewalks were visible and being low, flat grounds it is a matter of some surprise how the inmates and officers got around in the winter seasons. One could not but note some queer contrasts about the institution, as the fact of the guards being supplied with fine linen napkins and drawing the water they used from a well in an old syrup keg, with a rope passed through a hole in the top and no sign of a windlass. In fact the prison building had a very temporary, dilapidated appearance and the prisoners from lack of clothing—not having a change—looked equally dilapidated, and every appearance indicated a run-down institution.

These things I mention not with any intention of reflecting upon the late Superintendent, whom I found a gentleman in every respect and who furnished me a great deal of valuable information for which I am under lasting obligations and which was of material assistance in the management of the prison for the first half year. It was quite natural he should wish to carry on the institution as low as possible during the last quarter of his administration, and looking at it in that light I could the more readily excuse the officer's allowing the prison and clothing of convicts to become reduced to so low an ebb.

I was compelled to refurnish every department anew and draw heavily upon the appropriation of the present two years to put matters into a shape to be available. Also there appears in the accounts of expenditures items to the amount of fifteen hundred dollars for the first half of September, 1870, liabilities incurred by the late Superintendent.

## HEALTH OF THE CONVICTS.

I found it a rule of my predecessor to employ physicians at the rate of two and a half dollars per visit and fifty cents for each prescription. Upon consultation with Your Excellency upon the necessity of the physician visiting the prison daily, I came to the conclusion to make a change in this particular. Dr. A. M. Belt made a proposition to visit daily, and oftener if required, and write the prescriptions, for the fixed sum of one thousand dollars per year. This was accepted and having a fair stock of drugs and medicines on hand, a great portion has been put up within the prison. This we have found to work well without any additional expense to the State. The physician has been able to see the sick, and attend to their wants before the disease became settled, and from his forty years' experience and knowledge of his profession, most of the cases have readily yielded to treatment. For further particulars on this matter, I refer you to the Physician's Report annexed.

## DISCIPLINE.

In relation to discipline I have assumed that the largest liberty, consistent with safety, in prison life, is most conducive to good order and cheerful obedience. For the past eight months I have tried the experiment of allowing the men on certain public days or after their "task" or day's work was done, an opportunity of playing in the yard, or conversing together with perfect freedom, as their inclinations may lead them. This has been attended with the most happy results. Not in a single instance has this liberty been abused, but on the contrary has produced a marked change for the better in a more cheerful

obedience and prompt performance of labor, as also a more manly bearing and appearance, proving conclusively, that to make men of the material there confined they must be treated as men.

Every manly word spoken, or good deed done for them makes its good impression, not always to the same extent, but according to the capacity of the recipient, to be influenced by just principles. Kind words and good deeds are not lost even upon prisoners. Your Excellency eighteen months ago forbade any corporeal punishment inflicted on prisoners. I have the satisfaction of reporting its good working and think I can say that notwithstanding we have some of the most troublesome and dangerous men the institution has ever known, that the rules and regulations have never been better obeyed, or the discipline more perfect than at present. A specially gratifying fact to the Superintendent is the belief that the course pursued is the correct one and the advantages perceptible.

The Superintendent has always thought the object of the institution two-fold; not only to punish the offender for the crime committed, but also to reform him if possible, that he may not commit a like crime upon his re-entrance to the world. Any course likely to accomplish the latter I believe to be the best. More than one-third of the convicts are under twenty-six years of age—a number under twenty; young men who in consequence of idleness, evil companions, or intoxicating drinks, have committed crimes for which it is right they should suffer the penalty of the law. Yet if any means can be devised to reclaim, save, and make good citizens of them, not only a common humanity but the public interest demands its adoption.

I am aware there are many, whose good judgment can not be questioned, who doubt the expediency or success of

this course; who believe that kindness is thrown away upon convicts, and that a free use of the lash is the only way to subdue them, and maintain a proper discipline. I have sometimes found a convict whose conduct would seem to strengthen such belief, and where the indications were that he would be gratified by receiving a whipping, but have never known an instance when I thought a prisoner a better man by its infliction. Nor have I ever seen one, no matter how low and degraded, how hardened or steeped in crime, but had a spot in his heart that could be reached with proper management.

When a convict enters the prison he is carefully instructed in his duties, and what will be expected of him. A printed copy of the rules and regulations is placed in his cell, with the information that any violation of them will certainly meet punishment, while if he properly obeys the rules and behaves well he will be treated like a man; a caution which in many cases is sufficient to insure good behavior during the entire term of sentence.

The general success of the prison discipline depends in a great measure upon the officers having the immediate charge of the prisoners, and too much care cannot be observed in their selection. It is a prevailing idea that almost any man, strong, muscular and rough, no matter what is the character of his address, will do for a prison officer. This is a mistake. These men are governed more by brain force than muscle. The officer who is even tempered, firm and straightforward in his intercourse with them, who knows something of human nature, who, in short, is a gentleman, and never forgets it, will manage the men without trouble.

A convict no matter how ignorant and desperate will quickly understand and appreciate such qualifications in an officer, and will become "like clay in the hands of the

potter." On the other hand if the officer is rough or vacillating in his intercourse with him, he may expect nothing but trouble and vexation. The prisoners remind one of children in many respects; if promised anything and the promise is forgotten they become surly, cross, and if repeated they soon imagine the officers are deceiving them for interested purposes.

The officers having the prisoners in charge are humane and faithful. The care and custody of so large a number of desperate men involves the necessity of strict discipline on the part of the officers and unceasing vigilance on the part of the guards.

To the faithfulness of the officers and guards and their strict attention to the rules of the prison are we indebted that so few have escaped. In the selection of officers and guards the Superintendent considers himself very fortunate that, with two or three exceptions, he has had honest and industrious men. At the outset the rules governing officers were deemed by them rather strict, but they soon learned from the peculiar circumstances under which we labor, that discipline must be enforced as well among officers as prisoners. I will here take the opportunity of rendering my sincere thanks to my subordinates for the faithful and satisfactory manner in which they have discharged their various duties, during the past two years, and that a more competent body of men cannot be found in charge of any similar institution in the country.

#### LABOR.

In the management of this department of the prison, the Superintendent has been governed by the desire of making the same as profitable to the State as was consistent with the health of the convicts; for this purpose he

has kept as many of the men at the various shops during the winter season as was practicable. No such shops were found as I thought suitable and they were therefore erected; they were built large and roomy. Finding good mechanics among the prisoners, it seemed reasonable that with proper appliances, their labor could be made more profitable in their peculiar vocations than as day laborers on the brickyards or farms. We built carpenter, blacksmith, harness and shoe shops, as you will find in property account annexed. Also have commenced a large tannery which, when complete, will be one of the finest in the State, as it has all of the late improvements for saving labor and tanning with dispatch.

Such convict labor as could be made available in the mechanical department was applied principally in the carpenter and blacksmith shops to manufacturing doors, windows and iron work for the new building.

I found upon taking possession of the premises there was room for improvement in the main business of the prison—making brick.

The first of which I shall call attention to was the machine. Hall's Patent Moulding Machine is calculated, if properly managed, to turn out from 35 to 40,000 per day. I learned that the average day's work heretofore had been from 15,000 to 18,000 brick per day for which were required twenty-one men and four or five head of horses. This I thought could be improved upon, and the plan I adopted was to purchase a portable steam engine, that could be moved along the track prepared for the removal of the machine from one mud-pit to another. To this was attached the necessary machinery for grinding and moulding by steam. The experiment proved a success as no more men were required than under the old way of work-

ing, and instead of turning out the fifteen or eighteen thousand brick as formerly we have averaged every day the machine was run, thirty-two thousand per day, and have moulded as high as *sixty thousand* in ten hours!

One cord of wood will run the engine for three or four days, costing less than the feed required for the horses.

By reference to the tables annexed you will see that the amount of brick made at the prison in the two years past is equal to what has been turned off for the *four* previous years. This has been done while the men have been divided with the Building Commissioners, to work on the new building, to the number of fifteen, in the shops for their benefit also, besides cleaning a large tract of land, building fences, &c. Last year I dispensed with a superintendent of the brickyard, whose salary was from 65 to 100 dollars per month. To do this I was compelled to spend a great portion of my time upon the yard, in assisting the Deputy Warden, as one man could not keep so many men profitably employed. I also cut off another heavy expense in the shape of brick-burners—free men hired at the rate of four dollars per night to burn. This labor has been done almost entirely by convicts at the expense of one night guard during the burning season. We have done this by selecting men whose time had almost expired, and encouraging them to work, by allowing extra day's time.

The work was done better than by outside parties. In proof of how well they worked, we have burned eighteen kilns in two seasons, with but one accident, which was trifling, involving no loss of brick worth mentioning. Not a single arch has been melted, nor a yard of brick lost. This, we think, cannot be said of any other yard in the State.

We have been informed by parties connected with this yard that as many as forty thousand have been lost upon it at a time, by rain. By close attention we have avoided this, though only by taking the officers and such convicts as could be trusted and going upon the yards in the middle of the night to save the brick. On the yard, we have, as much as possible, worked the men by giving them tasks to perform. This encourages them to quick work, as after the performance of their stated labor, they were allowed to use the balance of the day as they chose. Some of them have fine gardens in the brickyard enclosure, which they have cultivated during these hours of recreation. We think the plan of giving them work in this way very good.

I endeavored also to raise the price of brick from six dollars per M, as had been customary, thinking that not a remunerative price to the State (by reference to table No. 26, you will form an idea of the cost of making brick) but the starting of other brickyards compelled me, after losing one large contract, to come down again to the old price. I believed they should be sold for eight dollars, but did not like to take the responsibility of holding out at that figure.

I found what necessary care and time was required of the Superintendent on the brickyard, during the first season, with the projected improvements in the shops and rebuilding of fences, and the extra demand upon his time in assisting as Building Commissioner, during both years, necessitated the employment of some one to perform the clerical labor. My time was not only well occupied, in keeping near a hundred men employed, but was more valuable to the State in that capacity than in keeping books. Seeing that the last Legislature would like to

have had a more complete set of books, showing the financial condition of the prison, and which, in justice to the late Superintendent, I will say no man can keep and attend properly to his out-door business as Superintendent, I employed a clerk. A complete set of books, showing all the transactions for two years, will be found in the office.

### MORAL CULTURE.

On the Sabbath day, at 11 o'clock, the commodious and pleasant chapel is half filled by the men, all but a few, necessarily detained, being present. The singing by the choir, consisting entirely of prisoners, is performed with much spirit, and considerable musical talent is displayed. Visitors speak highly of their performance, and say they listen to it with more pleasure than they have experienced at hearing choirs outside of prison walls.

Whatever may be the effects of expounding the Scriptures to these men, it is certainly listened to with marked attention, and no where can be found so large a congregation who seem to be so attentive to the words of Divine truth as they fall from the minister's lips.

Strangers visiting during service, often remark that they have never seen more apparent solemnity resting upon any people, than in our chapel.

The chaplains who have visited us for the past two years, have distributed a large number of religious papers and tracts among the men, which they trust will exert to some extent a counteracting influence upon the poisonous effects of the pernicious literature many indulged in previous to their confinement here.

They have also labored to furnish each one with a Bible; and, though some may neglect the Good Book, doubtless many read much more than when in the outside world, and wish they had followed its teachings.

I cannot close my remarks upon this subject without expressing my thanks to Chaplains Father Waller and Rev. I. D. Driver, whose report you will find annexed, for their unflagging interest in the moral welfare of the prisoners. The Superintendent owes a great deal of the successful discipline in force to their efforts, as, week after week, a change has been discernible in the moral conduct of those confined, and too much praise cannot be given to these gentlemen. They have visited the prisoners during sickness, and followed their remains to their last resting place, giving them the benefits of the Christian's rites of sepulture.

I am aware that many believe that moral teachings are wasted upon convicts. This, I think, is a mistake. My experience, at least, justifies me in thinking great good has been accomplished already. By such teachings I think the Superintendent has avoided having to relate the discovery of any *plots to assassinate* the officers, nor have we found it necessary to order the guards to fire upon the prisoners for *fighting* while at their labors, as has been the case.

#### EVENING SCHOOL.

It was discovered early in the present administration that quite a number of the prisoners could not read or write, mostly young men; as, also, others who were capable of teaching. Books, paper, slates, etc., were furnished, and an evening school, for the instruction of those who desired to attend, was opened.

The school prospered finely, and many who could not read a word or write their names, left the prison able to read and write a legible hand.

These things also tend to perfect the discipline, as when

they are studying their books they are not studying mischief.

#### THE SABBATH SCHOOL

Is also another feature recently adopted, and is greatly enjoyed by all who attend, and the influence of the officers is used to have as many as will take an interest in it attend. The success of the school is largely due to the punctuality and manifestly increasing love the teachers show for their work. Providence will certainly bless them for their love to these unfortunates.

Too much praise cannot be awarded to Drs. E. R. Fiske and Charles Hall, for their efforts in behalf of these men. The former commenced this good work under very discouraging circumstances, but has met with great success in his efforts of reformation, and he will never be forgotten by many of these unfortunates, in the interest he has taken for them.

#### THE LIBRARY

Is of very recent date and was started by subscription, and helped very materially by giving a social reception upon completion of the new building, in which the public were invited to participate, the admission fee therefor being fifty cents or a good book.

We were agreeably astonished at the number of the good people of Salem who turned out to help us. We received over six hundred volumes of books and about thirty dollars in cash. A library room had been prepared and the prisoners now have the benefit of these donations.

It might be proper at this time to suggest that the Legislature pass a law requiring every visitor to the prison to pay twenty-five cents as a fee, to be used in purchasing

books for the library. In nearly all the Atlantic States such a law is in force. A great many strangers visiting offer the officers money for the benefit of the library.

#### MISCELLANEOUS.

Without wishing to be presumptuous I think it is my duty to call the attention of Your Excellency and also the Legislature to a fact which militates very materially against reformation of prisoners.

This is the great disparity in the sentences of convicts for the same grade of crime. How a remedy can be applied, if at all, the Superintendent cannot say.

Men are confined in the prison, serving out a ten years' sentence for stealing an Indian pony, while others for the same or similar crime are sentenced by other courts for one or two years. No amount of reasoning will convince the former that this is equal justice. Were the sentences for the same grade of crime more nearly equal, prisoners would more readily believe their punishment was intended for their reformation, rather than that society was revenging itself upon them.

Some of the inmates of our prison were sent there in an early day for long terms, for crimes of no great magnitude comparatively, who, if they had friends at the time, are now forgotten. These men feel they are lost to the world and that there is no one left to care for them. They know they are fed, clothed, guarded and kept at work, and here they believe has terminated any interest which the outside world has in them.

Many of them have labored faithfully, and their conduct gives assurance, or at least a hope, that if restored to society they would be better men. It may be urged that these are the cases for which the Constitution and Law

have provided for the exercise of Executive clemency. Theoretically such is the case; practically the men remain year after year in prison.

There are men in the prison who in my opinion have become thoroughly reformed, and from whom society would run no risk in having restored to citizenship. If the State Prison is intended for reform, as well as a punishment, the cases of these men should be looked after, as every year makes them more hopeless, and faithless of human nature and justice. One of these, leaving the prison, having served out his full time, believing that when he was trying to be a good man no one appreciated it, and that once more free he has no friends, and shut out from society, is very apt to return to his old ways.

While some have thought the pardoning power of the Executive too frequently used, in my humble opinion it has not been nearly so frequently extended, during the past two years at least, as exact justice would require.

Your Excellency has pardoned during your administration in the ratio of one to eighteen confined; if there has been no greater reformation than one in eighteen our reform department of the State Prison is hardly a success.

The Superintendent thinks more favorably of the general morals of the men than such a showing sets forth.

While it is true Executive clemency has not been lavishly used—in fact less than by any former administration—the officers cannot but speak of the interest taken in the general welfare of the prisoners and the workings of the institution, by Your Excellency. The many reforms suggested by the Governor after his return from visiting prisons in the Atlantic States, have been of great benefit to those having charge of the prison and great credit is due to him for the successful management achieved by the officers.

Since our occupancy of the new buildings, and the better classification of the prisoners it is the opinion of the Superintendent, that in cleanliness, system, order and average of health, this prison will compare favorably with any similar institution in the Atlantic States. The prisoners are warmly clad and well fed. Nine months in the year they have all the vegetables the farm will produce, and as much as they can eat—in fact visitors say they are better fed than people outside. We have raised nearly all the vegetables used from our own garden, the work being done by convict labor, at a cost to the State only of the seed.

Without boasting, we think, this year the prison garden is the finest in the State, having an abundance of potatoes, beets, onions, cabbage, tomatoes, squashes, carrots, turnips, etc.—it has been so pronounced by many persons who have looked over it.

No one knows, without experience, the value to the prison of such a garden, in not only the reduction of the meat and flour bills, but the health of the men in having not only plenty of vegetables, but those that are fresh and wholesome.

We have had the men work well and have fed them correspondingly, believing that even in a pecuniary point of view, it is profitable; at least we have escaped any accusations from discharged prisoners of their *having suffered while under confinement from starvation.*

While the supply bills may look large, the amount of labor done and the income received, will fully justify the expenditures.

The Commissioners who have had control of the building of the new Penitentiary, for their earnest and efficient efforts to complete the work speedily and at the least pos-

sible cost, merit, and I have no doubt, will receive the approbation of the country. If the plan and character of the work are maintained until its completion, the people of this State may rely upon having a prison which, for durability, commodiousness and convenience, will not be surpassed in the United States, if equaled.

By reference to their report it will be seen the building should be completed before winter, or a loss will accrue. The north and south wings should be ceiled overhead, as a matter of economy in heating the rooms. The walls around are of wood, which will not last long, and, in fact, are not complete. They will want completion before safety can be insured in workshops. For further particulars I would refer you to their report, annexed.

In conclusion of this subject, it would afford the Superintendent great pleasure if, not only the usual committee, but all the members of the General Assembly that can consistently with their other duties, would visit and fully examine the workings of the institution, the plan and character of the work done as well as what remains to be done, and the necessity for doing the same. By so doing, they would be better enabled to act advisedly than otherwise.

#### RECOMMENDATIONS.

Under this head permit me to suggest the consideration of supplying the institution with such machinery as would make the winter work of the prisoners profitable, and a cash income returnable. A few years more will exhaust the clay suitable for brickmaking on the grounds, and other employment will have to be found. We have one of the finest water powers within the State, which can be made available at a small expense, to use in the workshops. The purchase of a water-wheel will be the main

cost. The power is sufficient to run a saw-mill, turning-lathe and planer, and could be made profitable in making wooden ware, wagons, cooperage, etc. Also boots and shoes, harness, leather, and various other manufactures could be established. The most of the above occupations are easily learned, and pay a fair profit. This water power cost the State some \$5,000 eight years ago, and your Excellency cannot too strongly urge upon the Legislature the propriety of having it made a source of income.

### THE PRISON WALLS

Is a subject I cannot but call your particular attention to. They are at present but temporary and unsafe; built entirely of wood, but fourteen feet high, they seem but an encouragement for prisoners to escape. When we reflect that a wooden wall of that height, only two inches thick, with the Penitentiary for life on one side and liberty on the other, it seems strange that attempted escapes are not more frequent. Only a short time since three men attempted to scale these walls. Two succeeded; but the third was stopped by the vigilance of the guards. While it is true none escaped, yet, it pains me to say, one was killed before he would yield to the repeated demands of the guard to stop. This young and vigorous man is shot. Who is to blame? Certainly, not the guard; they only did their duty. He was ordered by the Superintendent to stop. Three times he was told, if he did not he would be shot. To this he paid no attention. When within a few yards of the thick brush, the Superintendent ordered the men to fire. The fault, if fault there be, rests on the prisoner and the State. The one for placing himself in a position to be shot; the other in holding out temptations, in its wooden walls, for escape, leading thereby to death.

Another great wrong we are compelled to put upon prisoners, for want of sufficient walls, is the Gardiner shackle. We are necessarily compelled to iron them, so that they cannot scale the walls. There are prisoners who have worn this instrument of torture, known inside the prison as the "man-killer," until they are broken down in health and constitution. Young and strong men, with this continued, steady weight, which pulls all day upon their loins, yield after a few years, leaving the prison broken down physically, not from over-work or under-feeding, but simply from lugging about a lot of iron to keep them from scaling fences that are no protection without. Men lay in the hospital for weeks from wearing these things, suffering great pain and begging to be relieved from the load. Your Excellency ordered a year ago, that but as few as possible should be ironed. This was complied with, but leaves many yet still really and literally ironed down. *The Oregon Penitentiary is the only prison in the United States where this mode of murdering men by inches is practiced.* It is murder, and of the worst type. Another consideration is, that a convict with his irons off can do a great deal more labor than one with them on.

### LETTING CONVICT LABOR.

Three systems of disposing of convict labor have been tried in the various States of the Union. First, working them on account of the State, the raw material being furnished, and through its agents taking sole charge. Second, letting the prison in all its departments to parties for a specified annual amount, having control of the men under certain stipulated rules, and the entire disposition of their labor. Third, hiring the labor of the men to contractors at a per diem, the State reserving to itself the control and general discipline of the prison. The second

system is the one tried so unsuccessfully in this State. It has always and everywhere resulted in pecuniary failure, and is objectionable on account of moral and humane considerations. The system of the State furnishing and working the laborers is open to the objection that, only in rare cases and peculiar circumstances can it be made profitable. The third system seems to combine all the advantages of the two, while it secures and disposes of their earnings for a fixed and known sum, throwing upon the contractor the obligation of supplying material and disposing of the manufactured article.

Under this system the income can readily be approximated in advance, and it has also the advantage of being practical and simple in its operations.

The judgment of those having the best opportunity for experience has unreservedly been in its favor; so much so, that it may be regarded as absolutely necessary to financial success in a prison. This rule of working is in operation in Ohio, Illinois, Indiana, Pennsylvania, California and many of the Southern States, and I do not hesitate to recommend it as the better plan for this one. The prices range in the different States. California receives forty cents per day; Indiana, thirty-five; Pennsylvania, forty; and so on—fifty cents being the highest price per day paid that I know of.

By reference to the foregoing Exhibits, it will be seen that the expenditures have exceeded the income to the amount of eleven thousand one hundred eighty six 83-100 dollars. See Exhibit C.

Had it not been for the extraordinary items to be supplied in the way of clothing, and necessary fixtures to make the place comfortable, as also needed improvements in workshops, stockades, ditches, water pipes, pumps, etc., on which much labor, not appearing on accounts, has been expended, the Superintendent is satisfied the prison could have been made a self-sustaining concern.

The poor condition of the stockades made the necessity for extra guard, lumber, stockade and convict, labor, ex-

penditures. Also, the new building going on necessarily interfered with working the men to advantage, requiring two gangs of men, more guard expense, and consuming many articles and much labor not appearing in Exhibits.

In "cash expenditures", will be found an item of six thousand seven hundred and thirty-eight dollars, paid to Building Commissioners.

This was the proceeds of collections made on notes held by the State, for brick sold on Penitentiary account. When the appropriation of fifty thousand dollars was exhausted by the Commissioners, the building was left in a condition that, uncompleted, would result in material loss to the State. The wooden buildings were very dilapidated and unsafe, and so decayed, worm-eaten, damp and foul, that the health of the prisoners suffered, and unless there was a fair prospect for the completion of the new, would require an expenditure of several thousand dollars to make them secure. Counting the cost of this, and the loss from the unprotected walls of the new, and, after a consultation with the Governor and Commissioners, who recommended the use of the money, the Superintendent decided to put this much of the proceeds of collections into the building, in order that the prisoners could be removed before another winter should come.

The cost to the State is less in this: That this money enabled the Commissioners to employ labor at more advantage than on credit; that it saved the expense necessary to put the old buildings in order, and in the end will be a great saving in the health of the prisoners and the necessity of so many guards. Had the Commissioners waited for further appropriations, the season would have been too far advanced for work this winter, and the walls would have been exposed during two seasons of wet weather.

While the total expenditures for the two years, amounting to \$79,677 75, may seem a great increase over those of the previous two years, yet, by reference to Exhibit F, it will be seen that the total expenditures by the State do not amount to as much *per prisoner* by \$21 64 (amounting, for the two years, to the sum of \$1,904 32), as during the two years from 1868 to 1870. During the two years, also, many valuable permanent improvements have been made, making really a greater difference than above in favor of this term.

Aside from the usual register of vouchers, there is now a complete set of books in the office, showing in detail every transaction of the prison, which will much facilitate the examination of receipts and expenditures, and to which the attention of the Assembly is called.

| 1 Panel square.               | 1 Tool chest.                          |
| 10 Auger bits.                | 7 Firmer chisels.                      |
| 3 Wood rasps.                 | 1 Finishing file.                      |
| 1 Bradawl.                    | 1 Half-round file.                     |
| 21 Unfinished brick moulds.   | 375 feet strap iron, for brick moulds. |
| 16 Bottoms for brick moulds.  | 11 Moulding planes.                    |
| 200 Feet maple lumber.        | 1 Punching machine.                    |
| 1 Carpenter's bench and vice. |  |

## SADDLE-TREE SHOP.

|  |                            |
|--|----------------------------|
| 17 Saddle-trees, (uncovered and finished).   | 100 Wheelbarrow fellows.   |
| 400 Cantlebars.                              | 5 Saddle-tree benches.     |
| 100 Cantleboards.                            | 5 Vices, attached.         |
| 100 Horns.                                   | 11 Horses, attached.       |
| 3 Sets saddle-tree patterns.                 | 1 Horse shave.             |
| Legs, bars and handles for 12 brick barrows. | 1 Horse spokemaker.        |
| 1 Carpenters' bench.                         | 3 Chopping blocks.         |
| 1 Sheet iron stove.                          | 150 Feet white fir lumber. |
| 2 Firmer chisels.                            | 50 Feet cottonwood lumber. |
| 2 Steel squares.                             | 2 Tressels.                |
| 9 Draw knives.                               | 4 Wood rasps.              |
| 2 Whetstones.                                | 3 Compass saws.            |
| 2 Nail sets.                                 | 3 Hand saws.               |
| 2 Try squares.                               | 1 Rip saw.                 |
| 1 Set bench planes.                          | 3 Gouges.                  |
| 1 Screw driver.                              | 1 Spoke plane.             |
| 1 Brace.                                     | 1 Pair compasses.          |
| 4 Gallons raw linseed oil.                   | 1 Hand axe.                |
| 2 Gallons boiled linseed oil.                | 1 Power drill.             |
| 1 Gallon coach varnish.                      | 3 Bits.                    |
|  | 13 Paint brushes.          |
|  | 20 lbs Paint, mixed.       |

## ENGINE ROOM AND TOOL SHOP.

|                         |                                  |
|-------------------------|----------------------------------|
| 1 Grindstone.           | 100 Feet cable, 1 1/2-inch rope. |
| 100 Wheelbarrow spokes. | 20 Hoes.                         |
| 1 Block.                | 2 Shovels.                       |
| 5 Fleshing knives.      | 2 Bunches shingles.              |
| 1 Box tank.             | 1 Whip saw.                      |
| 1 Turning lathe.        | 3 Iron doors.                    |
| 5 Turning chisels.      | 300 lbs Putty.                   |
| 3 Gouges.               | 4 Pulley blocks.                 |
| 5 Scythes and snaths.   | 1 Cultivator.                    |
| 1 Iron kettle.          | 1 Shovel plow.                   |

60 Feet iron pipe.  
1 Governor for engine.  
1 Well windlass.  
2 Harrows.  
5 Plows.

1 Brass faucet.  
 $\frac{1}{2}$  Dozen whitewash brushes.  
2 Cradles.  
50 Feet inch rope.

## BLACKSMITH SHOP.

2 Bellows.  
2 Anvils.  
2 Vices; 2 hardy's.  
2 Sledges.  
5 Hand hammers.  
1 Rivet hammer.  
1 Horseshoe hammer.  
1 Horseshoe pincers.  
13 Punches.  
4 Drills.  
1 Set hammer.  
1 Hot countersink.  
1 Steel square.  
4 Eye-wedges.  
25 Gardner shackles.  
4 Flat files.  
1 Half round file.  
1 Square reamer.  
1 Monkey wrench.  
300 lbs Bar Iron ( $\frac{3}{8}$ x2).  
5 Pairs pipe tongs.

1 Rasp.  
1 Farrier's knife.  
2 Screw plates.  
15 Screw taps.  
2 Screw wrenches.  
1 Drill stock.  
1 Flatter.  
2 Splitting chisels.  
3 Swedges.  
1 Fuller.  
2 Half round cold chisels.  
1 Pair dividers.  
6 Cold chisels.  
19 Pair tongs.  
1 Brace.  
1 Fire traveler.  
2 Stone hammers.  
4 Stirrups.  
1 Wheel holder.  
1 Horseshoe swedge.  
1 Horseshoe pritchell.

## SHOE-SHOP.

16 Pairs old shoes.  
3 Pairs new shoes.  
36 Pairs lasts.  
1 Boot tree.  
4 Boot tree feet.  
1 Shoe bench.  
1 Shoe-hammer.  
1 Stretcher.  
1 Pair crimping forms.  
2 Pairs crimping irons.  
2 Shoe knives.  
1 Spring punch.  
1 Pair pincers.  
1 Shank screw.

2 Whetstones; 2 peg-awl handles.  
3 Rasps; 1 dozen peg-awls.  
1 Sole-scraper; 1 leather iron.  
1 Last-puller.  
4 Sewing-awl handles.  
1 Dozen sewing-awls; 1 channel opener.  
19 Pairs finishing tools.  
1 Prick-wheel carriage.  
1 Pair compasses; 1 splitting knife.  
1 Foot rule; 1 screw-driver.  
1 Long stick; 1 Jack iron.  
1 Shoulder stick; 1 chest.  
2 Pairs unfinished shoes.  
1 Padlock and hasp.

## HARNESS SHOP.

52 Saddle trees finish d.  
3 Side-saddle trees finished.  
3 Round knives.  
2 Head knives.  
3 Claw tools.  
2 Spring punches.  
2 Chandlers.  
3 Pairs Pliers.  
2 Pairs large pincers.  
6 Edge tools.

15 Punches.  
1 Glass slicker.  
10 Awl handles.  
1 Gross awls.  
1 Slitting gauge.  
1 Splitting gauge.  
1 Rein rounder.  
2 Hammers.  
5 Ticklers.  
2 Round awls.

14 Pricking wheels.  
2 Carriages.  
1 Straight knife.  
2 Collar spikes.  
5 Palms.  
1 Saddle horse.  
2 Varnishing cans.  
2 Sets plow harness.  
 $\frac{1}{2}$  Gross 2-inch breeching rings.  
1 Gross  $\frac{3}{4}$ -inch buckles.  
 $\frac{1}{4}$  Gross  $1\frac{1}{4}$ -inch buckles.  
 $\frac{1}{2}$  Gross  $1\frac{1}{2}$ -inch buckles.  
3 Benches.  
2 Drawers.

1 Pair compasses.  
2 Creasers.  
1 Pair patent-leather compasses.  
1 Saddle stamp.  
1 Stitching-horse.  
1 Punch block.  
1 Stove.  
9 Joints pipe.  
1 Elbow.  
2 Camanche bits.  
2 Sides alum tan lace leather.  
1 Office chair.  
1 Pair silver-plated Con. hames.

## BARN AND STABLES.

2 Two-horse wagons.  
1 Cart; 2 flails.  
1 Hay rack.  
1 Wood rack.  
1 Two-horse wagon (unfinished).  
3 Iron forks; 2 shovels.  
1 Straw-cutter.  
1 Set plough harness.  
1 Set cart harness.  
2 Sets double-team harness.

1 Rake; 2 saddles.  
1 Set single hack harness.  
2 Riding bridles.  
2 Mules.  
3 Horses.  
5 Halters; 1 padlock.  
15 Tons hay; 1 spring hack-wagon.  
2 Barley forks; 1 pick.  
Oats.  
Barley.

## BRICK YARD.

50 Feet 2-in. iron pipe.  
1 2-in. brass faucet.  
1 Belt tightener.  
44 Iron elbows on pipes.  
270 Feet iron pipe.  
2 Brass faucets.  
11 Dirt pits.  
2 Water tanks.  
2,000 Cubic yards of dirt thrown up ready for use.  
420 Cords of wood.  
140 Hack boards.  
195 Hack saddles.  
7 Picks.  
44 L. H. shovels.  
12 Mattocks.  
1 Hoe.  
3 Sand houses.  
1 Sand sieve.  
1 Monkey wrench.  
1 Well house.  
1 Pump.  
2 Tin cups.  
70 Feet rubber belting.  
3 Brick machines.  
2 Stages.  
1 Steam engine.  
1 Wood tender.  
25 Feet iron pipe.  
20 Feet 1 in. rubber hose.

2,000 Feet band iron on track.  
220 Feet 1-in. iron pipe.  
22 Brass faucets.  
350 Cubic yards sand.  
4,000 Feet kiln roof boards.  
23 Wheeling planks.  
16 Dirt barrows.  
18 Brick barrows.  
1 Tarpaulin cover.  
3 Horse power sweeps.  
4 Yard lutes.  
35 Brick moulds.  
6 Brick spring trucks.  
7 Tressels.  
2 Yard tampers.  
6 Brick pattens.  
3 Wrenches.  
1 Iron bucket.  
2 Hammers.  
2 Out houses.  
6 Axes.  
1 Wood saw.  
3 Iron pokers.  
2 Brass faucets.  
2 Files.  
2 Crow bars.  
2 Hatchets.  
4 Oil cans.  
2 Sand boxes.  
2 Mould tanks.

## PENITENTIARY REPORT.

|                          |                         |
|--------------------------|-------------------------|
| 2 Mud buckets.           | 2 Sand tubs.            |
| 1 Frying pan.            | 50 Feet 1-in. rope.     |
| 2 Trowels.               | 1 Vise and bench.       |
| 2 Hand saws.             | 5 Mud tubs.             |
| 1 Tape line.             | 1 Toolhouse and office. |
| 50 Kiln posts.           | 1 Sprinkler.            |
| 28 Kiln plates.          | 4 Headboards.           |
| 4 Kiln ridge poles.      | 8 Long straight edges.  |
| 600,000 Bricks.          | 6 Short straight edges. |
| 1,000 Feet. R. R. track. |                         |

## OLD BRICK YARD.

|                |                    |
|----------------|--------------------|
| 2 Water tanks. | 40 Feet iron pipe. |

## HOGS AND CHICKENS.

|                                  |               |
|----------------------------------|---------------|
| 100 Head stock hogs on premises. | 125 Chickens. |
|----------------------------------|---------------|

## WOODEN PIPE.

|  |  |
|--|--|
| 320 Rods 2½-in. wood water pipe on premises. |  |
|--|--|

W. H. WATKINDS,  
Superintendent.

SALEM, August 31, 1872.

---

## APPENDIX.

---

#### DEPOSITION OF JAMES BROWN.

I, James Brown, being duly sworn, deposes and says: Sometime in March, 1871, I was sitting in wash-house in Oregon State Prison Yard, when W. H. Burch, convict, came into the wash-house, and sat down by the fire to warm himself; in a moment or two afterward William Pettyjohn, boss teamster, came into the wash-house also; I was sitting behind the chimney where they could not see me; they were seated on either side of the furnace; there was no other person in the wash-house; Burch spoke to Pettyjohn, and he said: "It is very hard for the whites to run and tumble in the mud;" then Pettyjohn said: "It is very hard; that red-headed son of a bitch ought to have better sense than to order men out to work in such weather as this;" then Burch said: "Bill, I want to make you a proposition; you don't know what time you may be living under the same circumstances that I am now living under; I have a friend on French Prairie, that man that you saw talking to me the other day in the road; I spoke to him and asked him if he could assist me by giving me a little money, and he has promised me seventy-five dollars; now Bill, if you will give me a show to get out of this, I will give you that money;" Pettyjohn was silent for some time, and then said: "Burch, now if I give you a show, and you get out of here, and then get caught, how would that be, should you get punished, and tell the circumstances, it would be bad on me;" Burch replied: "If you will let me go, I do not think I can be caught, as I know the country so well, and if I am, I will

not tell anything on you;" then Pettyjohn said: "If you will run the risk, I will give you a show, and take the money that you spoke of." Just at this time the Superintendent called to Pettyjohn, and both Pettyjohn and Burch started to go out of the wash-house. They then discovered me, and Pettyjohn said: "Hallo, are you there?" "What are you doing there?" I replied: "Yes, I am here;" then Pettyjohn said to me; "Did you hear our conversation?" I said to him: "No, I have taken cold and am somewhat deaf; I did not hear your conversation;" we then separated. To my certain knowledge, William Pettyjohn was boss teamster, having charge of the team work of the Prison at this time, and W. H. Burch was a convict, employed as teamster, trusted as such, and subject to Pettyjohn's orders, and under his control. I make this statement voluntarily, without any expectation of reward, nor has any inducement been held out to me in order to obtain said statement, neither have I been coerced or subjected to threats in order that it might be obtained; I make it freely, of my own will and accord, and for the simple reason that justice may be done.

JAMES BROWN

Subscribed and sworn to before me, this 10th day of August, A. D. 1872.

[Seal.]

T. H. CANN,  
*Notary Public.*

*To the Superintendent of the  
Oregon State Penitentiary:*

WM. H. WATKINS, Esq.—*Sir*: At the first part of the present year, with your approval and consent, and in connection with the Chaplain, Rev. A. F. Waller, I organized a class among the inmates of the Penitentiary, for the purpose of studying the Holy Scriptures. Each Sabbath afternoon since that time, it has been my pleasure to meet them in the Chapel; and there has been a remarkably full attendance, considering that it was not obligatory on their part.

At first we were hindered by the absence of Bibles; but through the kindness of the Rev. I. D. Driver, fifteen copies were donated by the American Bible Society, and more than twice that number were given by Asahel Bush, Esq., they being left at the closing of the Chemeketa Hotel, to which they had been donated the year previous by the Rev. J. H. Wilbur. With other gifts of a lesser amount, we have sufficient, into about thirty volumes, which we hope to obtain before the close of the year.

Nearly every person here has read the Bible through, this year, and some there are among the number that have never read or never seen it before.

The teaching I have endeavored to make as plain and practical as it was possible; and from the questions and replies elicited, I believe that several are interested in seeking the truth; and that all have a fuller and better idea of their moral responsibility.

Soil that has become choked and exhausted by the

vices and crimes of sinful life, needs diligent work and patient waiting before the fruit of labor appears.

In order to interest them more in the exercises, and at the same time instruct them, I have procured a few dozen of Phillip Phillips' selections of Sacred Songs; and many of the words and tunes have become favorites with them. Perceiving the character of their selections—such pieces as would express their natural feelings as prisoners, and hearing the fulness and heartiness of their voices as they sing such selections—I have thought it would be an admirable assistance and help to have a work in song and sentiment especially adapted to their condition.

At the suggestion of yourself and the Chaplain, I canvassed the city of Salem in order to obtain books for a Library. The generosity of citizens enable me to report six hundred suitable and readable books presented; with a prospect of being able during the present month to increase the amount to one thousand volumes.

These are catalogued, and the name of the donors annexed to each volume, and proper credit given also for other contributions than in books. From the eagerness with which the prisoners avail themselves of its use, I have no doubt that the Library will not be the least auxiliary in the government of those under your control, as well as by employing their minds, to keep them from injurious habits and prevent their attempts to frustrate the course of justice.

While a spark of manhood is left in the heart, the fire can be re-kindled and burn none the less bright in the future for the warning that had almost quenched its light in degradation.

On the Pacific coast, more than anywhere else in the States, men are *surprised* into *sin* by the force of sur-

rounding circumstances and the strength of temptation; and with such persons there is vastly more hope of reformation.

Thus far I am pleased with the interest manifested; and when the arrangements are all perfected, and the Library completed with the anticipated number of volumes, I feel certain that, with their spare time given to the reading of good books, their minds will develop into something *above their former grade of life*.

In addition to the Library enterprise, I have secured the voluntary services of several gentlemen to give a series of lectures, or teachings, upon various interesting subjects on Tuesday of each week, during the long evenings of the rainy season.

Messrs. S. F. Chadwick, Professors Powell and Crawford of the Willamette University, Rev. P. S. Knight, Rev. I. D. Driver, Rev. Dr. L. L. Roland, Dr. C. H. Hall and myself, illustrating with various plates and apparatus, as well as specimens from natural history, &c.

These lectures, or more properly teachings, will be given to those with cards of permission from the proper officer, so that they also may be used as an incentive to a thorough performance of duty and obedience to the rules of the institution.

In conclusion, permit me to return my thanks for the uniform courtesy and kindness that has been extended to us in our efforts, and to acknowledge the assistance that friends without the institution have also given in behalf of the prisoners.

Every instrumentality that can be used to check and eradicate crime; to strengthen and fortify good resolutions, and to restore a healthy tone to the moral nature

hath power and efficiency in proportion as it reaches the heart.

Society is best protected when it makes true men and useful members out of those who may have sinned; and most endangered, when it turns loose the man it has educated to be a demon, because it leaves him an *outcast without hope*.

Very respectfully,

Yours, &c.,

E. R. FISKE,

Superintendent and Librarian Pen. S. S.

*To the Superintendent of the*

*Oregon State Penitentiary:*

W. H. WATKINS, Esq.:—In accordance with the requirements of the law, I submit for your consideration the following report of the past and present health of the inmates of the Penitentiary, the mortality, etc., and also some suggestions in regard to provisions for their future comfort.

Since September, 1870, when they first came under my supervision and care, the amount of general sickness has been less than at any previous time, as far as can be ascertained by examination of the records. At no time has any form of disease prevailed to any extent as an epidemic, and the per centage of disease has been less than would occur in communities, equal in size, at any other place in our State.

This is a little remarkable as many who are brought

here, come with the effects of former dissipation still perceptible in their systems, and I attribute much of the improvement in health, to the superiority of the food given them, as well as the benefit to be derived from habits of regularity and judicious exercise.

The larger proportion of disease manifested, is of a chronic or constitutional character, and yet we have not had any prolonged terms of sickness, or tendency to prostrations in any form; this fact would seem to indicate that the soil upon which the Penitentiary is erected, has nothing in its composition particularly deleterious to the health of those confined here, or each case would be to a greater or less extent aggravated by its presence.

On the contrary, the records show that the sanative condition has steadily improved, although each year a larger area has been cultivated, thereby showing the wisdom of the selection of the site.

Malarious diseases are less prevalent this year than last, and catarrhal affections seem to have increased both in frequency and severity, but as the cause of this has been taken away by removal into the new building where there will be less dampness and better air, it will also be relieved in time.

Two person have been transferred from the Penitentiary to the State Insane Asylum, as after proper examination they were decided to be of unsound mind, and the necessary care and attention requisite to safe and humane treatment could not be furnished with the means then possessed by this institution.

Their names are as follows:

C. Hayden, sentenced for burglary; transferred Nov. 21st, 1871.

I. Anderson, sentenced for horse stealing; transferred Dec. 29th, 1871.

Four persons have died from the following causes:

C. Martin, an Indian, March 14th, 1872, syphilitic disease.

J. Sheppard, March 16th, 1872, softening of the brain.

James Good, July 6th, 1872, shot in trying to escape.

J. Engle, July 17th, 1872, inflammation of the bowels.

The chief features of interest connected with these deaths, are: That the disease in the first instance had come to a stage that was incurable before entrance and that while the nature of the affection of the brain was not exactly known, until a post mortem examination revealed large structural changes, yet in the case of Sheppard, there was also no hope of effecting any change for the better, after the destructive process was once established.

Good, who was shot in attempting to escape, received the ball in his hip and it passed through the body, coming out near the navel. He lived about an hour and was conscious to the end.

Engle, sent here for the murder of Boon, had shown symptoms of despondency, and since the occurrence of his last sickness, resisted the administration of medicine, and even food, evincing a strong determination to die, if possible; it was also suspected that the inflammation of bowels, which was extremely intractable in character, might have been produced by his eating some poisonous herb, though nothing could be definitely ascertained with regard to it. No post mortem examination was deemed necessary, as his death was not attended with any peculiar manifestations.

The diseases that have prevailed at the Penitentiary during my term of office, have been principally of a

malarial character, but very mild in degree, and amenable to the ordinary remedies.

It is not surprising that this should exist because the nature of the work upon the banks of the creek and its vicinity in making brick and burning it, give all the exposure necessary to keep such affections in constant existence.

During the rainy season of 1871-2, the old Penitentiary was more than usually damp, owing to the rotting and consequent settling of its foundations, and many of the prisoners were troubled with an annoying catarrhal succession of colds; in some instances developing bronchial affections, but since the removal this form of disease, seems to have perceptibly modified its character.

Syphilitic affections are not prevalent to as large extent, or are they as severe in form as heretofore, but as these depend entirely on outside causes and are changeable as the grade of emigration, they will form an element of constant, but variable proportion in the sickness and mortality.

Rheumatic affections will probably be always in excess, as they have been in the past, since they are the inevitable result of depravity and exposure. Syphilitic taint and malarious element, with moist, long, winter seasons, have each a tendency to create this form of human suffering and as they are combined, (often the case here), we must expect a greater amount of disease.

I note this fact because of the number of those who are complaining of severe pains especially after the changes of the seasons.

Solitary and vicious habits, the pest and bane of imprisoned life, do not exist to any great extent, and I can but deem that it is in a large measure owing to judicious care and feeding. I am only able to judge of this by the

absence of those peculiar symptoms that would indicate indulgence, and also from the amount of physical vitality, that is apparent in the men as a body.

A greater tendency to diseases of the kidney and weakness of the back, with loss of muscular power in the lower limbs, seems to be due to the wearing of what is called the Gardiner shackle.

This is not a conclusion based on single instances but is the result of examination of every case that has been under my care. The rule has been that a few months only, are necessary to destroy the health and consequent usefulness of every one that has been subjected to their use; and a few years, at such a rate of deterioration, would end in destroying life. My impression is that while there may be *speedier* ways of ending life there are none that are *surer*. I would respectfully submit, that if other means could be devised that would be equally safe, they be left off as soon as practicable.

In conclusion, permit me to thank you for your humane attention to the wants of those who have needed assistance, and to also acknowledge, the help and effective aid that the Warden and other officers have from time to time afforded me in the treatment of the sick.

Very respectfully yours,

A. M. BELT, M. D.,

Physician to the Penitentiary.

## RULES AND REGULATIONS

*For the Government of the Oregon State Penitentiary.*

### REGULATIONS.

1. All rules for the preservation of order on and about the prison grounds, and for the better security of the prisoners under charge as are herewith published, or may hereafter be posted about the premises by the Superintendent or Wardens, *must be observed.*

2. All such rules must be posted in writing on a bulletin board hung in a conspicuous place in the Warden's office. Written rules shall be numbered, dated and signed officially when exposed.

3. Officers and employees will not be required from and after this date to regard parole rules, excepting those which deny conversation and intercourse of any nature with the prisoners. Officers and employees will also further notice that from and after the date of publishing such rules, no plea of ignorance regarding the same will be admitted, unless the party transgressing shall have been absent from the prison at the time such rules were displayed.

4. Written rules upon the bulletin board will remain exposed at least six days, and the rule so made will continue in force until rescinded by a like publication of six days.

5. From and after this date the Warden will have an alphabetical list of the officers and employees of the prison kept hanging in a conspicuous place in his office, from

which he will designate two officers each evening, as their number or letter indicates, for relief from duty. Officers will thus know, without inquiry, who may absent themselves, and no further permit will be required, and considering the peculiar circumstances under which we labor, no other absentees will be allowed, unless at the option of the Superintendent, in extreme or justifiable cases. Provided, however, that nothing in this regulation shall interfere with officers' privilege to relieve one another.

6. The penalty for violation or infringement upon any rule so written or published, will be *immediate discharge* from the service of the State.

7. Officers and employees will be required to observe strictly the following regulations, viz.: That no tale bearing to and fro between the prison and the city, concerning brother officers or concerning the management and officers of the prison, will be allowed; and any officer so offending will be dismissed from the service of the State. Provided, always, that it shall be the duty of each officer to report to the Superintendent any violation of the rules or neglect of duty.

8. All officers must rise in the morning at the tap of the bell, and muster in the office so soon as practicable thereafter. No reading will be allowed while in bed, by candle or lamp light, and all lights must be extinguished before retiring.

9. The officers in charge of the brickyard will see that no person enters the premises unless under a written pass from the Superintendent or Warden, except persons known to have business there, such as hauling brick, sand or wood, and then only one man to each team. And upon no consideration will ladies be allowed within the brickyard enclosure while the prisoners are at work.

## RULES.

### *Duties of Warden.*

Rule 1. The Warden shall receive all prisoners from the sheriffs or other persons having charge of the same, from the different counties of the State of Oregon, and give receipts therefor.

Rule 2. The Warden shall make a careful examination of all prisoners, upon their reception. He shall ascertain their place of nativity, their age, their trade or occupation, their former habits, their height, weight, color of hair, eyes and complexion, with any other marks or peculiarities on their person; also, their valuables, if any, and make a statement in writing of the same; which, in connection with the commitment and valuables, shall be transmitted to the Superintendent.

Rule 3. Upon the reception of such description, commitment and valuables, if any, the Superintendent shall make out and sign a receipt and deliver the same to the Warden; said receipt shall itemize and contain a full description of said valuables, and of whom taken.

Rule 4. The Warden shall see that the clothing of all prisoners in which they arrive at the prison, is properly renovated and labeled and taken care of during the time of their confinement, that the same may be delivered to them upon their discharge.

Rule 5. The Warden shall take care that all laws and rules for the government of the guards and of the prison, and for the discipline of the prisoners, are properly enforced. He shall see that the prison is kept clean, and

that all parts are in good order and condition throughout the building; that the prisoners are cleanly in person and clothing: that they are properly secured, when in or about the prison; that their chains and shackles are in proper order when they are given in charge of the Assistant Warden or guards. He shall personally inspect the shackles of every prisoner when lined up in the morning for duty, and shall count the prisoners in the line before turning them over to the Assistant Warden, who shall, in turn, count them and call back to the Warden the number. He shall at the same time and place enter the number in a book, to be kept for that purpose, and also issue to the prisoners their daily rations of tobacco.

Rule 6. All communications received by any officer or guard for or concerning any prisoner, or his or her affairs, must, upon reception by said officer or guard, be first submitted to the Superintendent. No communication will be allowed to go to or from any prisoner, without the approval of the Superintendent, and all persons connected with the prison are forbidden in anywise to communicate to any prisoner the contents or substance of any communication that the Superintendent may think improper to be communicated.

*Assistant Warden.*

Rule 7. The Assistant Warden shall have charge of the prison and perform the duties of the Warden when the Warden is absent.

Rule 8. The Assistant Warden shall direct the work and have charge of the guards and the prisoners, when at work upon the outside of the prison, subject to the direction of the Superintendent.

Rule 9. He shall see that the guards are properly

placed; that they are vigilant in the discharge of their duties, and that the convicts are diligent in the performance of their labors.

Rule 10. He shall see that the guard in charge of the brick-yard gate shall count the prisoners when they leave the prison enclosures, and also upon their return to the same, calling back the count to the Assistant Warden. He shall count the prisoners as they enter the brick-yard. He shall keep a record of the number of prisoners detailed for labor outside the brick-yard, and the guard in charge of such prisoners shall report to him the number, when returned from such duty. After the prisoners are upon the brick-yard, he shall put them to work as the Superintendent of brick-making shall direct, unless the same shall, in his opinion, endanger their safe keeping. He shall also see that the said Superintendent shall hold no conversation with the prisoners, nor the latter among themselves, except in a low tone.

Rule 11. He shall be required to keep with him a time-piece with the prison time, and also a whistle with which to call up the prisoners, ten minutes before the usual time of leaving the yard, that they may prepare themselves to be lined up, two and two, with the heavy ironed men in front, ready to march at the tap of the prison bell. He shall count the prisoners, and before starting for the enclosures, blow his whistle twice, as a signal to the guards that he is ready to march, and they may leave their posts. This rule shall be observed in all cases, except at the approach of a storm, or when the work in hand requires a delay not prejudicial to the safe return of the prisoners.

*Guards and Miscellaneous.*

Rule 12. No officer or guard shall use harsh or immoral language to any convict or to one another, nor shall they jest with any convict.

Rule 13. No guard shall hold any conversation with any visitor, or other guard, or convict, upon any subject, except to direct them in the performance of their labor or duties; nor shall any officer or guard shout to one another, or call in a loud voice to any person, unless it be in the discharge of an urgent duty requiring the same; nor shall any singing, whistling, or loud and boisterous conversation be allowed about the office or prison.

Rule 14. No convict shall hold any conversation with any person, except the officers and guards only with the consent and in the hearing and presence of the Superintendent, Warden or Assistant Warden.

Rule 15. The guards shall yield implicit obedience to their superior officers, and do all that is in their power to insure good order and discipline, in accordance with the laws and rules that have been adopted for the government of the prison and prisoners.

Rule 16. Any guard found reading or sleeping while upon duty, and any officer, guard or employe of the prison who shall be found intoxicated upon the premises, or who shall bring or cause to be brought upon the prison grounds, ardent spirits of any description, will be subject to immediate discharge.

Rule 17. No guard will be allowed to go into the kitchen, except upon business or by permission of the Superintendent or Warden.

Rule 18. No officer or guard will be allowed to draw

rations or supplies to be taken or used outside the prison gates.

Rule 19. Any guard from whose "beat" a prisoner escapes, or any one who may allow a prisoner to escape while under his charge, shall be subject to immediate discharge.

The above rules, approved by the Governor for the government of the State Penitentiary, October 1st, 1870.

L. F. GROVER,

Governor.

EXECUTIVE OFFICE,  
SALEM, October 1st, 1870. }

W. H. WATKINDS,

Superintendent.

## DUTIES OF CONVICTS.

1. Every convict shall be industrious, submissive, and obedient and shall labor diligently. No secret conversation or plotting will be allowed.

2. No convict shall secrete, hide or carry about his person, or keep about his cell any instrument or thing, without the knowledge of the officers, that would assist him in making an escape.

3. No convict shall write or receive a letter to or from any person whatsoever, nor have intercourse with any persons without the prison, except by leave of the Superintendent, or Warden in charge.

4. No convict shall waste, injure or destroy, any mate-

rial or tool, or article of public property, or deface or injure anything that belongs to or about the prison.

5. Convicts shall always conduct themselves towards the officers with due deference and respect. Cleanliness in their persons, dress and bedding is required. When they go to their meals or labor they shall proceed in regular order and in silence. Their behaviour at the table shall be orderly.

6. No convict shall leave his or her work without permission of an officer. He shall not speak to or look at visitors without permission of an officer, nor shall he make any unnecessary noise in his labor, or in the prison, or do anything which is subversive of the good order of the prison or prisoners.

7. Convicts may speak to the Superintendent, the Warden or the Assistant Warden at any time. When the Superintendent is not present, the convict may notify the Warden or Assistant Warden, that he wishes to see the Superintendent; and it shall be the duty of the Warden or Assistant Warden to notify the Superintendent of the same.

8. All conversation by convicts shall be in a mild, low tone of voice, and with all deference to the person addressed. Profane or immoral language is prohibited.

9. Convicts are not to contend with an officer or guard, nor attempt to direct or control him in his duty.

10. Convicts are not to sleep in their clothes; but shall lay or hang each article separately, that the guard on duty can see if this rule be violated.

11. During Divine Service all convicts must sit erect during the delivery of the sermon; no lounging or hanging down of heads will be permitted. During singing and prayers they will assume such positions as are usual in the

church of the officiating minister; provided the same is made known to them, otherwise a respectful and reverential position must be assumed.

12. All violations of these rules, and of any other that shall be made hereafter, shall be punished in such manner as shall be directed by the Superintendent.

13. Convicts having no families will be allowed to write one letter per month only, unless paper, stamps, etc., are furnished by the convict. Those having families will be allowed one letter per week.

14. Convicts will not be allowed to speak nor communicate with visitors to the prison, without the consent of the officer in charge.

The foregoing rules have been prescribed by the Governor of the State of Oregon, for the government of the State Penitentiary.

L. F. GROVER, Governor.

EXECUTIVE OFFICE,  
SALEM, Oregon, Oct. 1st, 1870. }

W. H. WATKINS,  
Superintendent.

## LIBRARY

*Of the State Penitentiary, Salem, Oregon.*

All persons connected with the institution, are entitled to the use of the books by giving attention to the following rules:

Rule 1. The Library will be opened for exchange of books, immediately after close of labor each evening.

Rule 2. Every book taken must be entered in the Register, and credit given therefor on its return.

Rule 3. No person shall keep a book longer than one week at a time.

Rule 4. Books must not be loaned from one to another.

Rule 5. Only one book can be taken at a time.

Rule 6. Any injury or defacement of books, will be charged to the person in whose possession the book is found.

Rule 7. Any one refusing obedience to these rules, or neglecting to account for books entrusted to his care, shall be deprived of the use of the Library.

W. H. WATKINDS,  
Superintendent.

E. R. FISKE, Librarian.

## CHAPLAINS' REPORT

*Of the Oregon State Penitentiary.*

*To the Members of the Oregon Legislature:*

GENTLEMEN: During the past two years our visits to the State Prison have been attended with marked interest. A decided improvement has been made in temporal affairs, in the erection by the State of the new prison, etc.; adding much to the comfort of the inmates, and giving additional security to the public, by preventing escapes.

During the two years most of the convicts have been supplied with Bibles; and in addition to the regular "Religious Services," an interesting Bible class is taught every Sabbath; and a Library of between five and six hundred volumes of literary, scientific and religious books has been procured (mostly by the benefactions of the people of Salem,) for the benefit of the prisoners. All this has been done by voluntary contribution, and without compensation, which renders it of greater value to the prisoners, as every act is stamped with the broad seal of Christian benevolence, which is of the greatest value to this class of men, as it is the most effectual way of overcoming their selfishness.

To see the fruit of this labor and sacrifice, it is only necessary to visit the prison and witness the growing order that prevails.

We deem it a duty to bear testimony to the humane treatment of the prisoners by the present Superintendent, who has always been favorable to the moral and mental

culture of those under his charge; and we think it difficult to conceive how the condition of the inmates can be materially improved, without a continuance of the present order of things.

A. F. WALLER,

I. D. DRIVER,

Agent A. B. S.

SALEM, August 22, 1872.

## REPORT

OF

### PENITENTIARY BUILDING COMMISSIONERS.

*His Excellency,*

*L. F. Grover,*

*Governor of the State of Oregon:*

The undersigned, Penitentiary Building Commissioners, appointed to act in the erection of permanent Penitentiary buildings, for which the sum of fifty thousand dollars was appropriated by the Legislative Assembly of 1870, beg leave to submit for the consideration of your Excellency and the honorable members of the Legislature, the following report:

So soon as practicable, after organization of the Board, plans for the new building were inspected, and a selection made combining the benefits of the Rhode Island and Maine States Prisons.

Mr. G. W. Rhodes, Architect, was employed to furnish plans and specifications, to correspond with what was deemed a good combination of the two buildings.

Bids were solicited for furnishing such material as was required—for stone, iron, lumber, lime, etc.—which contracts were afterwards awarded to Messrs. J. C. Josephs; Hawley, Dodd & Co., E. D. Towl and George Abernethy, respectively.

On such days, during the fall and winter of 1870 and

1871, as were fair, the convicts were employed in excavating for the basement and foundations, clearing and grubbing, and leveling the grounds preparatory to an early start in the spring. During the winter a great portion of the stone was delivered, and such as required cutting, for the front and water tables, was dressed.

The stone masons were put to work in April, and the work progressed without delay, the brick masons going on in May, during the spring and summer seasons.

About the first of May, the cash in the State Treasury being exhausted, it was found necessary to make some arrangement, whereby the mechanics employed could receive their pay in a more direct manner than by vouchers and warrants. So long as the warrants were paid at the Treasury, they were cash to business men over their counties, but when they became endorsable for payment only, the laboring men were forced to sell them at from seven to ten per cent. discount, in order to meet their bills. Aside from this, it was also inconvenient to them, as they were paid off usually Saturday nights—they could get no money at that time of day, and were compelled to come to town Monday morning, present their voucher, get the warrant, sell the same, and pay their bills. This was a half-day's time lost, beside the loss on their pay, by the discount, and they felt inclined to look for other places.

To obviate these difficulties, an agreement was made to sell large warrants at ninety-five cents on their face.

The laborers consented to work at the same rate per day, as they had been, and take their pay the same as it was received by the Commissioners, at ninety-five cents on the dollar—they standing this loss rather than a greater one, as before described.

Vouchers were accordingly drawn in sums of five thou-

sand dollars, as appears per voucher record and detailed cash statement annexed, sold as above, and paid to the men, as per receipts on file. This was done until the stone and brick masons and tenders were through—the whole amount thus drawn being seventeen thousand dollars. The plan was found to work satisfactorily to the men, rendering the issue of many small accounts needless, and making the labor of paying off much less.

In the matter of lime, we found difficulty in buying for warrants—it being considered a cash article—to get it we contracted with the Trustees of the M. E. Church, to deliver them brick, for which they were to furnish us lime, or cash to pay for it. Under this arrangement we bought it at cash rates.

At the exhaustion of the appropriation, the Commissioners found themselves with the walls of the prison completed, put without means to enclose them. To leave it roofless, for the storms of perhaps two winters to beat upon it, would incur a great loss to the State. The Superintendent complained that it was not safe to keep the prisoners in the old wooden building he was in; and that he would be compelled, at a large expense, to repair or nearly rebuild it. The Grand Jury condemned it as unsafe, and recommended the completion of the new building. The Commissioners, in their report of 1870, say: "*New buildings and walls are demanded, as the present wooden foundations have decayed,*" and if they were so in 1870, they were much worse in 1871. Also, Superintendent M. P. Berry, Esq., in his report for 1870, calls the particular attention of the Legislature to the insecurity of the wooden structure.

Taking all these things into consideration, the Commissioners, after consultation with the Governor, who recom-

mended the same, concluded to complete the building if they could.

Messrs. Hawley, Dodd & Co., of Portland, agreed to furnish the iron cells, and such further iron and hardware required, and take their pay in vouchers. The principal mechanics were willing to do the same; the convict labor and proceeds the Commissioners deemed they had ample authority for using, under the law of 1864, creating the Board; but *some* money was absolutely necessary to carry on the work. The Superintendent, upon the recommendation of the Governor, turned over to the Commissioners the proceeds of certain notes and accounts held by him, belonging to the Penitentiary, to the amount of \$7,684 37 as appears in Exhibit 1 annexed.

The work, which was at a stand still, was renewed, and pushed forward as rapidly as possible to completion.

On the 1st day of August last, the convicts were removed thereto, and are now, we think, safe—as much so, at least, as iron, brick, stone and mortar can make them. The Commissioners think the building, as it now stands, will compare favorably with any similar institution in the country, in respect to durability, convenience, sanitary arrangements and safety, and recommend that the Legislature visit it in a body, for examination.

The Commissioners deem it but just to render their thanks to the Governor for the especial interest he has taken in the construction of the work, and to the Superintendent for the readiness with which he has responded to their requisitions of men and materials; also, the boss mechanics for their faithful attendance to the interests of the State.

## NEW PENITENTIARY BUILDING.

The design embraces a prison structure having a house for Warden, Deputy Warden, and for officers' quarters, connected with and forming part of the edifice.

The principal structure consists of a central octagonal building, with three radiating wings. The central building is to be used as a kitchen in its lower or basement story; for a chapel guard room and general office in its first, and for a hospital in the second story.

Two of the wings, on opposite sides of the central building, are designed to be used for prisoners; and each of said wings is to contain a block of cells, within the exterior walls, arranged upon a plan so as to be a prison within a prison. Each block is calculated, when completed, to contain four stories of cells; there being 22 in each story.

The spaces between the blocks of cells and the exterior walls of the wings are appropriated as areas. Within these areas, at the level of the floor of the second, third and fourth stories of the blocks of cells, galleries are to be placed extending around each block. These galleries are to communicate with iron stair cases, placed at the inner end of each block of cells within the central octagonal building, and extending up to each story of cells.

The guard room, or Chapel, is separated from each area of the two prison wings by brick wall, each of which contains two large arch-ways, grated with bars of iron, with open iron doors in the same, leading to the areas and galleries of the cell blocks; thus yielding instant communication with every cell, in both wings from the guard room floor of the central building. The several stories of the central building are lighted by windows placed in the angular corners.

The cells receive light and ventilation from the areas, which in turn are amply supplied by large windows in the exterior walls of the prison wings.

Each cell contains a ventilating flue, carried up in the brick walls, in the center of each block of cells, which connects with chimneys on the top of the building. The roof of the central building is surmounted by a cupola, in which is placed the bell for the use of the establishment, and in which also may be placed a clock.

The third wing is appropriated for the necessary offices and apartments required for the institution. The first or basement story contains the dining room, store rooms, &c. The second or principal story contains the Superintendent's office, the Warden and Deputy Warden's offices, Library, wash room, &c.

The third story contains the chambers and other necessary sleeping apartments as required.

The central building is 62 feet square, outside of its walls; and its first or basement story is 10 feet clear height; the other two remaining stories being 18 feet each.

Each wing, containing the cells, is 75 feet long and 42 feet wide, outside of its walls.

There are now erected and finished two stories of cells in each block. The first story is made of hard burned brick, with a 16-inch wall. Each cell measures 5 feet 6 inches by 8 feet, and 7 feet high. The iron cells, which are 44 in number, are made of  $\frac{1}{2}$ -inch plate iron, and measures 6x9, and 7 feet high. Each and all the cells have built within, two wrought-iron bedsteads, as a fixture to its walls, making each cell sufficient to hold two prisoners. Each is supplied with water from a reservoir, on the top of the building, which, in turn, is supplied from the creek, with one of Blake's patent steam pumps.

The wing appropriated for the officers' quarters, measures 75 feet in length and 40 feet extreme width, outside of its walls. Its first or basement story is 10 feet clear height; its principal story 17 feet, and its third or chamber story, 14 feet high.

This wing is finished off with such materials as is usual for dwelling houses, excepting several of the doors for the offices, which are made of iron, and the windows grated with iron.

The floor throughout the entire basement is laid with asphaltum and gravel; also the floors in the prison wings, and supported by segmental arches laid in hard burnt brick, which rests on suitable brick piers built in the cellar.

The floors and ceilings of the Chapel and Hospital being made of wood are supported up by iron columns.

The entire building is warmed by steam, which is furnished from two large flue boilers, located outside and in the rear of the main building. The Chapel and Hospital contain two large manifold heaters, each. The two Prison wings are supplied by alternate coils of pipe extending along the walls in the areas on both sides of the cell blocks.

The entire building is also supplied with water from the tank on the top of the building.

In the erection of the said building there were two and one-half millions of brick used.

|                        | To account Cooke, Dennis & Co, for brick transfer'd..... |    | 12 00     |
| Total.....             |  | \$ | 58,015 30 |
| By voucher No. 45..... |  | \$ | 58,015 30 |

From the foregoing it will be seen that the amount of expenditures over receipts, amounts to fifty-one thousand, six hundred seventy-eight and 3-100 dollars. The Commissioners cannot but urge upon the Legislature the justness of paying these claims, believing as they do that the articles furnished were at reasonable prices and the labor

was at reasonable rates. These parties have trusted the State for their property when few men were willing to do so; the State has received the benefit of that labor and material and a refusal to appropriate for their payment besides doing them an injustice would materially affect the credit of the State.

In addition the Commissioners would recommend the further appropriation of Six Thousand Dollars for painting the walls outside and the roof; ceiling overhead, stairs leading to the cells, already contracted for and many little unfinished matters about the building.

In conclusion the necessary vouchers, receipts and pay rolls for the total expenditures are filed with the Secretary of State; in the office is a complete set of books which will be found as explanatory of all items, to whom paid, etc., to which the attention of the Legislature is called.

JOSEPH HOLMAN,

A. McALEXANDER,

W. H. WATKINDS,

Commissioners.

SALEM, Aug. 31, 1872.
